# PRESS RELEASE

## GREENLEE ADDS THREE NEW MANUAL RANGING MULTIMETERS

ROCKFORD — Greenlee has added three new multimeters to its test and measurement family. The DM-20, DM-40 and DM-60 are all Greenlee exclusive, manual ranging digital multimeters that are built to make the electrician's job faster, safer and easier.

Manual ranging multimeters are used in many everyday electrical applications where the electrician does not require extended features or high accuracy. Measurement capabilities for the DM-20, DM-40 and DM-60 include: AC and DC voltage, DC current, temperature (K-type thermocouples only), and resistance. Other capabilities include checking diodes, verifying continuity, and testing 1.5 V and 9 V batteries.

An interactive demonstration will be placed on the Greenlee website. In addition, an updated collection of Greenlee test instrument interactive demonstrations will be sent out with the next quarterly mailing.

For more information on the DM-20, DM-40 and DM-60, or other test instruments from Greenlee, a Textron company, contact Greenlee, 4455 Boeing Drive, Rockford, Illinois 61109-2988. Phone (815) 397-7070. Fax (815) 397-1865 or visit the website at [www.greenlee.com](http://www.greenlee.com).
