Plug 'N Test with Greenlee's New Polarity Cubes
GT-10 and GT-10GFI Polarity Cubes Small and Effective

ROCKFORD, Ill. November 17, 2005 —Greenlee's new polarity cubes, GT-10 and GT-10GFI, are designed to work with typical 3-wire NEMA 120 volt receptacles. Both testers are ergonomically designed to fit comfortable in the hand for hours of tireless troubleshooting.

Once plugged into a standard outlet the light sequence on the GT-10 or GT-10GFI provides a visual indication that wiring is correct or incorrect. The GT-10GFI works with GFI outlets and confirms that the ground fault outlet is working properly. The GFI-10 and GT-10GFI polarity cubes are independently test to UL's protocol 1436. Both polarity cubes have a Lifetime Limited Warranty.

For more information on the GFI-10 and GT-10GFI polarity cubes, or other test and measurement products from Greenlee, a Textron company, contact Greenlee, 4455 Boeing Drive, Rockford, Illinois 61109-2988. Phone (815) 397-7070. Fax (815) 397-1865 or visit the website at www.greenlee.com.

Textron Inc. (NYSE: TXT) is a \$10 billion multi-industry company with more than 43,000 employees in 40 countries.
