GREENLEE LAUNCHES TWO NEW VOLTAGE TESTERS
GT-95 AND GT-65 feature auto-hold, EF, self-check and over-voltage warning

ROCKFORD, Ill. —Greenlee introduces its new GT-65 and GT-95 voltage testers, designed with four new features that takes one of the most commonly used electrician tools and made it faster, safer and easier. The new GT-95 and GT-65 voltage and continuity testers feature auto-hold, EF, self-check and over-voltage warning. Both models have UL safety category ratings of Category IV 600V and Category III 1000V.

The auto-hold feature automatically activates when the tester is removed after making a voltage reading. The LEDs flash the last measured value for 10 seconds. It's a hold feature without the hold button. The EF function is a convenient non-contact method for detecting voltage. For more precision, such as distinguishing between current-carrying and ground wires, connect a test lead to the + input terminal and use it as a probe.

The third distinguishing feature is the self-check function. The self-check function is a quick method to verify that the LEDs and LCDs are working properly. The GT-95 and GT-65 voltage testers have an over-voltage warning feature. The 1000 VAC/380 VDC LED flashes if these levels are exceeded. The GT-95 LCD displays "OL" above 1000 VAC or DC.

Greenlee's new GT-95 & GT-65

The GT-95 voltage tester has three additional features for added safety. They are GFCI test, shock hazard warning and selectable shaker. With the shock hazard warning, the LEDs are red if the measured voltage is above 54 VAC/30VDC. The GT-95 also gives the electrician the option of activating the shaker feature. If enabled, the shaker signals that AC voltage is present between the leads.

As with all Greenlee test and measurement products, the GT-95 and GT-65 have Greenlee's lifetime limited warranty.

For more information on the new voltage testers , or other test instruments from Greenlee, a Textron company, contact Greenlee, 4455 Boeing Drive, Rockford, Illinois 61109-2988. Phone (815) 397-7070. Fax (815) 397-1865 or visit the website at www.greenlee.com.

Textron Inc. (NYSE:TXT) is a \$10 billion multi-industry company with 44,000 employees in 40 countries. The company leverages its global network of aircraft, industrial and finance businesses to provide customers with innovative solutions and services. Textron is known around the world for its powerful brands such as Bell Helicopter, Cessna Aircraft, Kautex, Lycoming, E-Z-GO and Greenlee, among others. More information is available at www.textron.com.
