

CA1 Cable Anchor™

Organize and secure up to eight cables at a time.

Introducing Greenlee's new Cable Anchor™ — designed to save you time and effort by securing up to eight cables to wood studs and plates using only one nail. That's a significant improvement when compared to traditional staples that typically secure only two cables. The Cable Anchor's™ innovative holding fingers help prevent each cable, regardless of size, from going slack during installation. This unique feature provides a helping hand to the installer, making installations quick and professional.

Plus, the Cable Anchor™ positions all cables at least 1-1/4" (32 mm) from the edge of studs and plates to meet the 2005 NEC 300-4(d) and the Canadian Electric Code Part 1, Section 12-516.

The Cable Anchor™ can be used not only for power cables but also for voice, data, and video cables.

Using the Cable Anchor™ is easy. Simply align the start gauge on the side of the Cable Anchor™ to the edge of the stud or plate. Drive the nail until it is fully seated with the stop gauge against the edge of the stud or plate. Press smaller cables directly into the desired slot. For larger cables, press your fingers on either side of the control tab on top of the Cable Anchor™ to open the cable slot, then place and dress the cables as desired. Additionally, unlike staples, cables can be added to or removed from the Cable Anchor™ at any time.

PRODUCT FEATURES

- **Quickly and easily** secures multiple power, voice, data, and video cables. (Follows all applicable codes regarding spacing between power and low voltage cables.)
- **Correctly spaces cables** from stud and plate edges to meet U.S. and Canadian electrical codes.
- **Innovative design** allows the user to open the cable slots by pressing on either side of the control tab on top of the Cable Anchor™.
- **Nail is provided in ready position** for speed and convenience.
- **Two stage clamping** secures each cable independently in position.
- **Bright yellow color makes the Cable Anchor™ easy to see** in low light conditions making visual verification easy.
- **Packaged in convenient re-sealable bag.**
- **High impact resistant material** for cold weather durability.
- **Flame retardant UL94HB material.**
- **U.S. Patent #D508,394.**

SPECIFICATIONS

Secures a maximum of 8 cables

Power cables: (4) 10-2 w/G NM, (4) 12-2 w/G NM, (8) 14-2 w/G NM, (4) 14-3 w/G NM

Voice, Data, Video cables: (8) up to 0.3"(7.6 mm) each

When securing more than 4 power cables, cable ampacity should be determined in accordance with NEC 300.15 and Canadian Electrical Code 4-004
