

GREENLEE®

A Textron Company

There With You™
faster • safer • easier®

KP1022

Crimps both Insulated &
Uninsulated Terminals

Hardened Cutter Blades

KP1022

Two Crimping Tools in One

Why buy two crimping tools when one tool can do it all? The new Greenlee KP1022 is capable of crimping both *insulated* and *uninsulated* terminals and splices from 10-22 AWG and it's easy to carry in a tool pouch. With long curved handles and double-cushioned grips to provide good leverage and comfort, the KP1022's precision-machined and hardened cutter blades at the nose of the tool make cutting copper and aluminum wire easy.

The smooth pivot action of the tool makes it easy to use with one hand. And, the forged steel and hardened design provide for long life. The KP1022 is just another way Greenlee is working to make your job faster, safer and easier.

Features

- Two die positions permit the KP1022 to crimp both insulated and uninsulated terminals and splices
- Forged steel and hardened design provides long life
- Smooth pivot action allows tool to easily be used with one hand
- Double-cushioned handle grips are easy on the hands
- Precision machined and hardened cutter blades make wire cutting easy
